

### Key Facts:

CA Building Products offer a comprehensive range of products and services, in particular the MR-24™ watertight standing seam roof.

### Coverage:

CA Building Products has a 20-year history in the UK and produce MR2-24 in partnership with American Fortune-500 listed Butler Manufacturing Corporation.

### Installation & Training:

Only Latchways trained personnel are permitted to install the Constant Force post and ManSafe componentry. Following installation, Latchways will arrange for the system to be tested, certified and tagged prior to use.

Familiarisation training for the building owner is available, as is an annual inspection programme, thus ensuring that the system is correctly maintained and complies with European safety standards.

For details of approved installers, ongoing advice and support services contact Latchways on +44 (0) 1380 732700.

### Technical Considerations:

The principle of the system relies on letting the roof move under thermal expansion and contraction without detriment to performance. The tab-centering device on each clip ensures the seam tabs are always correctly aligned to allow the roof to act as a single continuous floating membrane, with no adverse effect on the weather tightness of the building project.

Should you require a system on the MR-24™ (steel) roof profile, please contact Latchways technical department on +44 (0) 1380 732700.

For information regarding CA Building Products built up on site roofing profiles, please refer to section 4.

## Specification details for CA Building Products Standing Seam Roofing System:

### MR-24™ (Aluminium)

Cover width	End anchor post set*	Intermediate post set	90° Corner post set	Variable corner post set	End anchor post set**	Pendulum post set
