

**Key Facts:**

Haironville TAC manufactures profiled coated metal roofing and cladding sheets, standing seam systems in steel and aluminium, composite panels, deckings, and tile support systems all in an array of colour options broad enough to meet even the most demanding of designs.

**Coverage:**

Haironville TAC, part of the Usinor Group, distributes one of the widest ranges of roofing and cladding products in Europe.

**Installation & Training:**

Only Latchways trained personnel are permitted to install the Constant Force post and ManSafe componentry. Following installation, Latchways will arrange for the system to be tested, certified and tagged prior to use.

Familiarisation training for the building owner is available, as is an annual inspection programme, thus ensuring that the system is correctly

maintained and complies with European safety standards.

For details of approved installers, ongoing advice and support services contact Latchways on +44 (0) 1380 732700.

**Technical Considerations:**

Because the roofing panels are available in long lengths of up to 12 metres, the need for end laps is limited and an extensive range of curved junctions can give a striking visual appearance at both corners and parapets. Profiles are available in hot dipped zinc galvanised steel, with a coating choice of either TAC200+ plastisol or PVF2 and polyester.

Should you require a system on the R38 (6.152.38), R45 (3.366.45), R43 (5.180.43), and Tac tray 90 roof profiles, please contact Latchways technical department on +44 (0) 1380 732700.

For information regarding Haironville TAC composite and Tacdeck 508 roof profiles, please refer to sections 3 and 5 respectively.
