

Key Facts:

The Tacdeck 508 secret fix roofing system is designed for long, low pitch roof slopes, whilst complying with the Part L and J building regulations. With no fasteners to penetrate the external envelope and, with a combination of tight fitting side laps and sheets turned up at the ridge, Tacdeck 508 provides a complete weathertight roof system for both new and existing buildings.

Coverage:

Part of the Usinor Group, Haironville TAC is a leading manufacturer and supplier of roofing and cladding systems to the building industry.

Installation & Training:

Only Latchways trained personnel are permitted to install the Constant Force post and Mansafe componentry. Following installation, Latchways will arrange for the system to be tested, certified and tagged prior to use.

Familiarisation training for the building owner is available, as is an annual inspection programme,

thus ensuring that the system is correctly maintained and complies with European safety standards.

Technical Considerations:

Sheet lengths of up to 37 metres allow for continuous ridge to eaves applications. Tacdeck 508 is available in a wide range of colours in either TAC200+ leathergrained plastisol or 25 micron pvf2 (non-standard).

Should you require a system on the 6.152.38 (R38) and Tacray 90 roof profiles, please contact Latchways technical department on +44 (0) 1380 732700.

For information regarding Haironville TAC composite and built up on site profiles, please refer to sections 3 and 4 respectively.

NB: Only restraint systems are to be used on this roof type. Fall Arrest systems are not compatible at this time, please refer to the Fall Protection chart in section 2 for full details or contact Latchways technical department.
