

Incorporating the business
formerly known as PMF

Key Facts:

Corus Panels and Profiles, part of the Corus Group, offer an attractive and economic range of roof profiles to meet both the aesthetic and structural requirements of the designer, whether it's new-build or refurbishment projects.

Coverage:

Corus Panels and Profiles supply roofing products throughout the UK as well as exporting around the world.

Installation & Training:

Only Latchways trained personnel are permitted to install the Constant Force post and ManSafe componentry. Following installation, Latchways will arrange for the system to be tested, certified and tagged prior to use.

Familiarisation training for the building owner is available, as is an annual inspection programme, thus ensuring that the system is correctly maintained and complies with European safety standards.

For details of approved installers, ongoing advice and support services contact Latchways on +44 (0) 1380 732700.

Technical Considerations:

The durability of cladding depends on many factors such as substrate type, sheet coating, colour choice, local environment and cladding pitch. A minimum pitch of 4° is recommended for through fix roof sheeting.

Should you require a system on the R19, R38A, R46, or R100 roof profiles, please contact Latchways technical department on +44 (0) 1380 732700.

For information regarding Corus Panels and Profiles composite roof profiles, please refer to section 3.

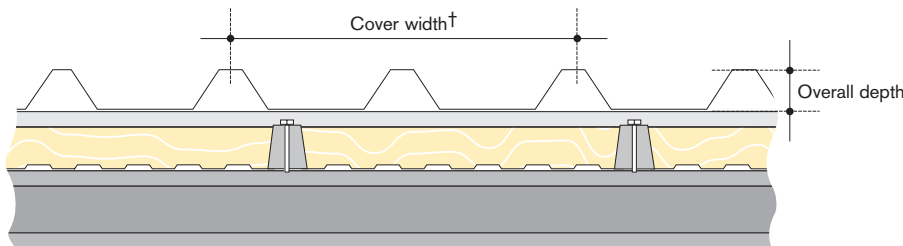

NB: SOME PROFILES ARE NOW ORDERED AS SPECIALS, PLEASE CONTACT CORUS PANELS AND PROFILES FOR DETAILS.

**Specification details for Corus Panels and Profiles
