

Key Facts:

SpeedDeck Building Systems, renowned for their Secret Fix roof profiles, have introduced a standing seam system call SpeedZip, enhancing their already popular range of products.

Coverage:

SpeedDeck Building Systems, part of Eleco plc, has been supplying roof systems to clients throughout the UK and mainland Europe for more than 20 years.

Installation & Training:

Only Latchways trained personnel are permitted to install the Constant Force post and ManSafe componentry. Following installation, Latchways will arrange for the system to be tested, certified and tagged prior to use.

Familiarisation training for the building owner is available, as is an annual inspection programme, thus ensuring that the system is correctly maintained and complies with European safety standards.

For details of approved installers, ongoing advice and support services contact Latchways on +44 (0) 1380 732700.

Technical Considerations:

SpeedZip is made from 0.9 mm aluminium and is available for straight, convex, concave and waveform roofs with two cover widths of 305 mm and 400 mm. The profiles can be manufactured at their site in Suffolk in lengths of up to 40 m. Alternatively, SpeedDeck can supply their on-site mobile production unit with fully trained staff and equipment to produce any length of profile. The profiles are fully compliant with AD L2 and Part J of the new building regulations.

For information regarding SpeedDeck secret fix profiles, please refer to section 5.

Specification details for SpeedZip Standing Seam Roofing Systems: SpeedZip® 305 and SpeedZip® 400 (Aluminium)

Cover width	End anchor post set*	Intermediate post set	90° Corner post set	Variable corner post set	End anchor post set**	Pendulum post set
305	84001-00	84002-00	84003-00	84004-00	84005-00	84006-00
400	84001-00	84002-00	84003-00	84004-00	84005-00	84006-00

Cable order code: 00900-00 Transfastener order code: 85085-00
 *Standard end anchor post set with tension adjustment on one end. **For extra long spanning lengths use end anchor post set with tension adjustment on both ends. (Refer to page 2:2 for details).

Profiles & widths:

Overall depth	Cover width	Panel name
65	305	SpeedZip® 305
65	400	SpeedZip® 400

The standard colour of the post is Metallic Silver (Trimate paint K903/560/9). Other colours are available to order at additional cost subject to availability and lead time. Contact Latchways technical department for further information.

† Latchways reference to cover width is defined as the width of the fixing points for the Latchways base plate.
