

Key Facts:

SpeedDeck Building Systems was the first roofing manufacturer to engineer the secret fix principle as an alternative to conventional built up on site systems. The SpeedDeck double interlocking secret fix roof system provides a versatile product that is simple to use. As well as having a manufacturing plant in Eye, Suffolk, SpeedDeck produce a significant proportion of their roofing products onsite by specially designed mobile onsite profiling rollers.

Coverage:

SpeedDeck, a part of Eleco plc, have been supplying roofing products throughout Europe for over 20 years.

Installation & Training:

Only Latchways trained personnel are permitted to install the Constant Force post and ManSafe componentry. Following installation, Latchways will arrange for the system to be tested, certified and tagged prior to use.

Familiarisation training for the

building owner is available, as is an annual inspection programme, thus ensuring that the system is correctly maintained and complies with European safety standards.

For details of approved installers, ongoing advice and support services contact Latchways on +44 (0) 1380 732700.

Technical Considerations:

SpeedDeck secret fix roofing is available in steel and aluminium, in straight, convex or wave form shapes, manufactured in the factory or on-site.

SpeedDeck can be used in a wide variety of constructions, including acoustics, high humidity, structural decks etc, to suit any building type, be it retail, commercial, educational, health or residential.

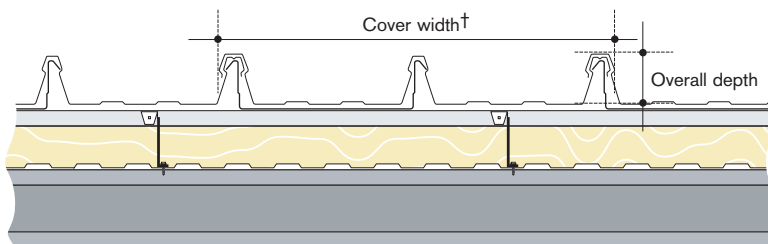

For information regarding SpeedZip standing seam roof profiles, please refer to section 2.
