

ManSafe® for Roofing

Bespoke walkway solutions

In nearly all instances it is impractical to prevent roof access, therefore the ideal solution is to create a level surface with all fall hazards protected against. WalkSafe® is a range of walkways and fall proof covers which can provide a designated safe access route, guiding a workers' movement in areas where there are potential fall hazards or fragile surfaces.

WalkSafe walkway with Constant Force® post

WalkSafe levelled walkway

Manufactured from recycled PVCu, all WalkSafe products have an anti-slip surface and are a lightweight, practical solution which can be easily installed to replace existing wooden duckboards, scaffolding boards. Additionally, WalkSafe systems are ideal to be used in conjunction with collective fall protection and personal fall protection systems, such as Latchways' VersiRail guardrail or a Constant Force post cable systems.

The WalkSafe product range consists of:

- Levelled walkway
- Stepped walkways for all roof types
- Valley gutter walkway
- Half-valley gutter walkway
- Access platforms
- Fall proof covers for fragile roofs
- Rooflight covers for fragile rooflight's

The WalkSafe system

WalkSafe stepped walkway
